PROFILE

Dedicated Front-end Developer with a passion for design and a focus on collaborative problem solving. I have a background in management and team development and prioritize the well being of my clients and co-workers. I use my years of experience in effective communication and teamwork to create positive, accessible, and user-friendly digital experiences.

PROJECTS

HUE ARE YOU | [LIVE] [REPO]
React, Group Programming ,CSS, API

Hue are you is an app designed to find paintings from the Rijskmuseum based on a users makeup selection. Features calls to multiple API's and endpoints, comprehensive error handling. This project was developed by a four person team using mob, paired, and individual programming.

POCKETBOOKS (API WEB APP) | [LIVE] [REPO]
HTML, JavaScript, CSS, RESTful API

A paired programming app that utilizes the openlibrary API to take user information and display books based on category. Features multiple API calls and filters to help the user find the perfect book, and helps them find a library near them to borrow from.

PLANTED (PSD CONVERSION) | [LIVE] [REPO]
SCSS, HTML, JavaScript

Complete PSD Conversion project featuring multi-page responsive design, style guide adherence & implementation and mobile design. Made interactive with JavaScript. Implements version-control via Github and file-naming conventions with Sass partials.
